

Title: Dealing With Early Top Lane ganks and Wave management at level 1/2

Score:

--- POST CONTENT ---

I've been dying a lot to early level 2/3 ganks from junglers and I'm in a bit of a dilemma, when playing K'sante I'm pushing for a level 2 lead and harassing my opponent usually getting them that low like in the video below but it always seems to never pay off since I just die, I know I'm clearly doing something wrong.

\-is it the wave management? Do I have to let the irelia hit the wave so it doesn't push that hard?

\-do i just accept that a gank level2/3 is coming and play safe till first back?

\-did I make a mistake in the wave that it didn't crash fast enough so it can reset?

\-should I have cleared the wave faster so that I can go and ward?

any advice would help
