

Title: Where is a good place to get wave management help for top lane

Score:

--- POST CONTENT ---

I'm currently silver and I play sett riven top. I struggle to effectively crash the wave and I have no idea what to do if my opponent freezes under tower and it's my Achilles heel and I want to improve but I have no idea where to even look to receive help.

Coach Chippys on YouTube just released a season 16 video on wave management like 2-3 days ago.

Once the minions crash into the tower and the tower is hitting the minions, it cannot "freeze". As long as you do not do anything, the wave will come back to you.

If the wave is frozen IN FRONT of the enemy tower, then the mistake you made was 30-60s ago. If the wave is frozen in front of the enemy tower, you need to fight the enemy and force them to back off so you can get the wave to crash. This might not be possible if you are weaker than the enemy/you have bad waveclear. In that case you can only ask jungle/sup to bail you out, or you go proxy the next wave.

if an enemy freeze under tower u have 4 possible moves.

1. crash the wave by pushing it in, losing hp, recall.

2. get jg help to crash.

3. roam.

4. do nothing.

the 1st option is a pretty good default. the longer u wait to crash it, the worst off u will become.

the second is only if u have a good jg, which is not likely.

3 is unlikely to get any results. and it will, at best, make u even. unless u get super lucky

4. never do this. by far the worst.

Just watch Alois. He is really good at teaching wave management among other top lane fundamentals
