

Title: Any good videos about wave management, back timings and other such things for higher elo players?

Score:

--- POST CONTENT ---

When I say "higher elo", I mean that I have reached Masters but I feel like I'm just sort of doing my thing and it's working out, but I can tell that some people I face are way better than me and abuse my lack of wave knowledge. Are there any good videos that focus on more advanced tips and knowledge, not just for beginners?
